

## Abstract of the Disclosure

A method for producing a compound of the formula:

5 by reacting

(1) in a secondary or tertiary alcohol in the presence of a base, or

(2) in the absence of a base is provided. According to this  
 10 method, a 1-substituted-1,2,3-triazole compound having a  
 tyrosine kinase inhibitory action can be produced efficiently  
 in a high yield at an industrial large scale by a convenient  
 method
